Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE THREE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION
RESPONSE TO AMENDMENT

1. This Office action is in response to Applicant's amendment, filed 12/17/2002.
2. Claims 1-42 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-42 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Cerf et al. (U.S. Pat. No. 6,418,138) in view of Ogasawara (U.S. pat. No. 6,513,015).

As per claims 1, 3-6, 8-12, 15-28, 30-34 and 36-42 Cerf discloses a novel communication system/method that includes mobile units distributed within a wireless communication network which are connected to a packet switched network (a method for public wireless network access), the method comprising the steps of:

detecting the presence of a local Area Network (LAN) with at least one mobile device at a location (see., abstract, col 2, lines 35-45, col 4, lines 51-67, col 5, lines 45-56);

Art Unit: 3621

requesting identification information from each at least one mobile device through a node of the LAN (see., abstract, , col 3, lines 12-34, the gateway or proxy server is capable of identifying information); sending user information from each at least one mobile device to the node, the user information including identification and demographic information about a user of each at least one mobile device (see., abstract, col 2, lines 35-45, col 4, lines 51-67);

receiving access to the LAN with the at least one mobile device (see., abstract, col 4, lines 51-67); accessing a global communication data network through a gateway of the LAN with the at least one mobile device (see., abstract, col 3, lines 11-27);

sending the demographic information about the users of the at least one mobile devices at the location to an advertising server (see., abstract, col 3, lines 37-59, col 5, lines 45-56);

receiving commercial messages through the gateway from the advertising server, the commercial messages being selected based on the demographic information of the users (see., abstract, col 3, lines 11-27); and

sending the commercial messages to a display at the location for viewing by the users (see., abstract, col 1, lines 12-65, col 3, lines 37-59).

It is to be noted that Cerf fails to explicitly disclose the step of receiving the demographic information about the user of at least one mobile device. However, Ogasawara discloses an electronic shopping that provides for customer recognition using wireless identification. A customer ID card is further useful in assisting each customer in making purchase transactions. The customer ID card is used in connection with a customer assistance which is able to develop and display various personalized

Art Unit: 3621

assistance recommendations based on an analysis of demographic and mobile terminals (see., abstract wherein said customer's demographic profile, col 3, lines 50-67, col 4, lines 1-33, col 5, lines 17-37). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the radio communication system of Cerf by including the limitation detailed above as taught by Ogasawara because such modification would provide the benefit of determining that a particular customer has made any purchases of items based upon the customer ID.

As per claims 2, 7, 13, 14, 29 and 35 Cerf discloses the claimed method, wherein the advertising server is managed by an advertising service (see., col 3, lines 37-59, col 5, lines 45-56).

RESPONSE TO ARGUMENTS

5. Applicant's arguments filed on 12/17/2002 have been fully considered but they are moot in view of new ground of rejection.

CONCLUSION

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136 (a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing data of this action. In the event a first reply is filed within two months of the mailing data of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory
